Manual testing on Samsung Galaxy Sky			**Samsung Galaxy Sky (Android 6.0.1)**				
SW Version 1			**Version 1**				
Note: When run on Amazon Device Farm, the default explorer tester does not actually run any tests							

Test ID	**Test Scenario**	**Components Involved**	**Platform**	**Test StepsTest Description (Steps)**	**Actual Results**	**Pass/Fail**	**Priority**
Unique ID for every test case	Title that describes what you are testing	if needed, describe components involved in your test	For example: Samsung S7, Android iOS Safari Browser IE, etc.	Step by step description for the test in order to be able to reproduce results	Description of results. This can include media to show what happened.		Critical High Medium Low
1	Music from barcode with numbers		Samsung Galaxy Sky	Scan a barcode with numbers. You should be returned to the main screen. Then musical tones should play, with each tone corresponding to the number from the barcode.	Results are exactly as expected from the test description	PASS	
2	No music from non-number barcodes		Samsung Galaxy Sky	Scan a barcode with no numbers. You should be returned to the main screen. No music should play.	Results are exactly as expected from the test description	PASS	
3	No response from non-barcode		Samsung Galaxy Sky	Try to "scan" something that is not a barcode. You should remain on the barcode scanning screen. The scanner should not respond.	Results are exactly as expected from the test description	PASS
